

## **PROFI Engineering Systems AG**

PROFI AG is a medium-sized IT service provider headquartered in Darmstadt, Germany.

The company supports its clients – from all industries and the public sector – in all aspects of digital transformation with a specialized portfolio of IT solutions, services, and consulting offerings related to server and storage systems, hybrid cloud, AI, business continuity, cyber resilience, IT automation, digital workplace, software development, and managed services.

PROFI is committed to providing the highest level of expertise, reliability, and quality, with measurable success and a direct contribution to the value creation and competitiveness of its clients.

PROFI employs over 300 people at 12 locations across Germany. For many years, the company has been among Germany's most successful IT solution providers and maintains long-standing partnerships with all leading IT manufacturers.
